

## SEECLEAR FACILITIES CASE STUDY

**Y17028**

### CLEANING SERVICES FRAMEWORK

#### Scope:

Provision of cleaning services to **18 schools in the Kent, London and West Sussex** area via the **KCS Professional Services Cleaning Services framework Y17028**.

#### Services:

Our services include regular daily cleaning to all school areas, staff areas and adhoc cleaning such as carpet cleaning, upholstery, high level cleaning and window cleaning including abseiling.

The schools are operating evening cleaning due to COVID-19 and we have to be in the school no earlier than 3:30 pm. All staff have to wear masks and gloves when cleaning on these sites. We are using mops, cloths and washable materials once and cleaning them at high temperatures to ensure all COVID-19 virus substances are no longer present.

Due to the COVID-19 outbreak we have provided fogging and deep sanitising services through out these schools, including cleaning libraries and the books themselves. We only use directly employed staff on these contracts. Staff are fully trained and are now trained in COVID-19 cleaning and how to use the equipment correct and safely.

#### Solution:

You can access Seeclear Facilities compliantly via the **KCS Professional Services Cleaning Services framework Y17028**.

Seeclear Facilities offers **FREE sanitisation cleaning into every contract** so you can re-open your doors knowing your school environment is COVID secure.
