

# Working together to help Public Sector and Education organisations successfully switch to refurbished IT.

---

Because there is no planet B

## Achieving sustainable IT practices, without compromise.

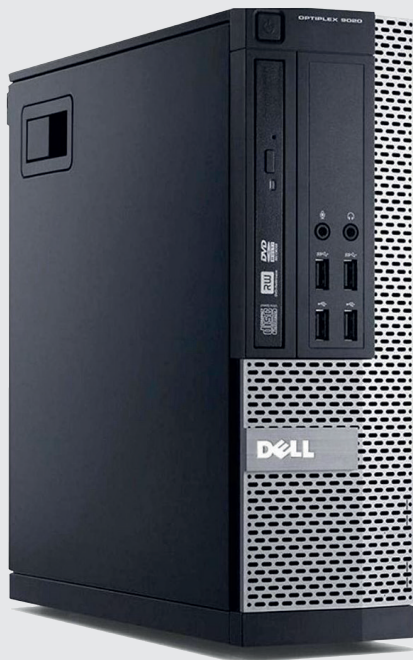

If you could save up to 40% and reduce your environmental impact without compromising on the performance of your IT equipment, would you want to know more?

Our goal at Renewed is to enable Public Sector and Education organisations to successfully switch to refurbished IT wherever possible, without compromising quality and performance. As an approved supplier on the KCS Procurement Services Framework, we want to work with you to identify, source and deliver a cost-effective, sustainable and seamless solution for your IT hardware needs; BSI Kitemark™ certified refurbished IT hardware.

## Why switch to refurbished IT from The Renewed Store?

- Purchase BSI Kitemark™ certified reconditioned, high-quality, grade A refurbished IT hardware, backed up with a minimum 12-month warranty
- Save in the region of 40% versus the price of new
- Pay for the tech spec you need
- Enhance your organisation's social value and ESG performance
- Contribute to a circular IT economy, help to reduce digital poverty
- Quality and reliability first. Our return rate is 0.8%, well below the industry average of 5 – 8% on new machines

## Measuring the impact of refurbished IT hardware.

Working in collaboration with you, the Renewed experts will advise on the make, model and specification of laptop, desktop, tablet, or monitor, to ensure you pay for the tech you need, instead of paying for new or over-spec machines.

If you could save on average 40% on your IT hardware purchasing, what difference could that make to your organisation? Redirecting funds to other areas of the organisation? Meeting ever-tighter budgets? Or, purchasing more IT equipment to service the wider organisation?

The benefit of refurbished IT is not just financial, although we know a 40% saving is compelling. The impact on the planet and your organisation's environmental performance (your ESG targets), can be significant:

	Saving for each refurbished laptop purchase	Sizing up the benefits
<b>Carbon Saving:</b>	65 kgCO <sub>2</sub> e	100 laptops = 6.5 tonnes carbon saving
<b>eWaste:</b>	2.1kg eWaste avoided	100 laptops = 210kg eWaste avoided. The IT industry is one of the biggest contributors to e-waste and landfill around the world, creating 50 million tonnes per annum.
<b>Mining:</b>	Mining for 66 individual minerals avoided	On average, a typical computer uses 66 individual minerals. Refurbished IT ensures maximum lifetime use of those minerals and avoids conflict mineral mining. Protecting those impacted by unethical labour practices in the supply chain.

It is, surely, our responsibility to do everything within our power to create a planet that provides a home not just for us, but for all life on Earth.

Sir David Attenborough

## About Renewed.

We are a BSI Kitemark™ Certified Reconditioner, which builds on our long-standing internal quality control process, Q20, and ensures refurbished products from The Renewed Store can be purchased via the KCS Framework, with confidence, knowing they are of the highest quality.

Founded 25 years ago, Renewed have been delivering high-quality, refurbished laptops, desktops, tablets and monitors to organisations across the UK. With a deep belief and passion that the IT industry needs to develop more sustainable practices, refurbished IT from The Renewed Store is a cost-effective, viable, reliable, and sustainable solution for your IT hardware needs.

As an approved supplier on the KCS Framework, you can be assured that purchasing your refurbished IT from The Renewed Store is a safe option. The Renewed Store holds many accreditations, including:

- ✓ Dell Preferred Partner
- ✓ HP Business Partner

### Insurances:

- ✓ Employers Liability Insurance >£10M
- ✓ Public Liability Insurance >£5m
- ✓ Product Liability Insurance £5m
- ✓ Professional Indemnity Insurance >£1m

## Case studies.

### Refurbished IT equipment led to £48,000 saving for The Oldershaw School.

With an ageing infrastructure, The Oldershaw School needed to upgrade the ICT suite, however the budget available didn't stretch to buying new. We worked with Keith Hallam, Network Manager, to source and supply 80 refurbished Dell desktops, to save them £48,000.

'We basically managed to kit out three computer rooms for the price of one. Everyone actually thinks they're brand-new machines from Dell because the quality, speed and features are that good.'

### Working with the Inspiration Trust to reduce IT hardware spend.

Tasked with an IT budget reduction of 40% across 14 academies, Michael Vaughan, Head of ICT at Inspiration Trust, turned to Renewed. The Trust purchased 200 refurbished desktops and laptops, to save £50,000.

'We cannot fault the systems and still can't believe the like for like comparison between Renewed's refurbished systems and the brand-new computers.'

## FAQs.

### Is refurbished IT as reliable as new?

Our refurbished IT performs as new. The Renewed Store is a BSI KiteMark™ Certified Refurbisher which demonstrates the quality and reliability of our IT hardware. Our return rate is <1%, well below the industry average of 5 – 8%.

### What warranty do you offer?

A 12-month warranty is included on all hardware as standard, exactly as you would receive on a new machine. Your warranty can be extended to 36-months if required.

### I don't need to save money, why should my setting buy refurbished IT?

No matter how big your budgets, the cost to the planet of continually and unnecessarily buying new IT equipment is unsustainable and too great to be ignored.

### How can I be sure the equipment is good quality?

If you are seriously considering Renewed's refurbished IT, we will deliver a sample machine to you – at no cost to you – so that you can try before you buy. That's how confident we are.

### What is the age of refurbished computers?

Typically, we provide refurbished equipment which is 3+ years old. At this age, laptops, tablets, PCs and monitors are fit-for-purpose to run the required software, systems, networks and servers. Brand new machines are often over spec'd for purpose and will cost far more.

We are challenging the perception that IT hardware always has to be new; refurbished IT can deliver the same high-performance as new. Working with KCS, we can help you to change your approach and make a financial and environmental difference.
