

 IOMART

For Today's
Demands and
**Tomorrow's
Opportunities**

As your trusted technology partner, the Iomart Group helps you solve complex challenges, optimise your technology investments, and plan confidently for the future.

With over 25 years of experience and industry-leading expertise – now strengthened by the addition of Atech – we offer the capabilities, partnerships, and strategic insight to help your organisation thrive. Securely, at scale, and with lasting success.

1

Why Organisations Choose the Iomart Group

We focus on delivering outcomes that matter to your organisation. Here's why so many clients trust us to help them achieve their goals:

Expertise on Demand

Access top-tier specialists without the overhead of hiring or training. Our accreditations and partnerships mean you benefit from deep technical expertise when and where you need it.

Proven Experience, Faster Results

With more than two decades of public sector experience, we bring established methodologies, templates, and best practices to accelerate success and reduce risk.

Access to Exclusive Innovation and Funding

Our strategic partnerships unlock early access to emerging technologies, exclusive commercial incentives, and Microsoft-funded programmes – helping you stay ahead of the curve.

Solutions Tailored to You

We take the time to understand your specific needs. We don't just 'lift and shift' – we design solutions that meet you where you are today and scale with you into the future.

2

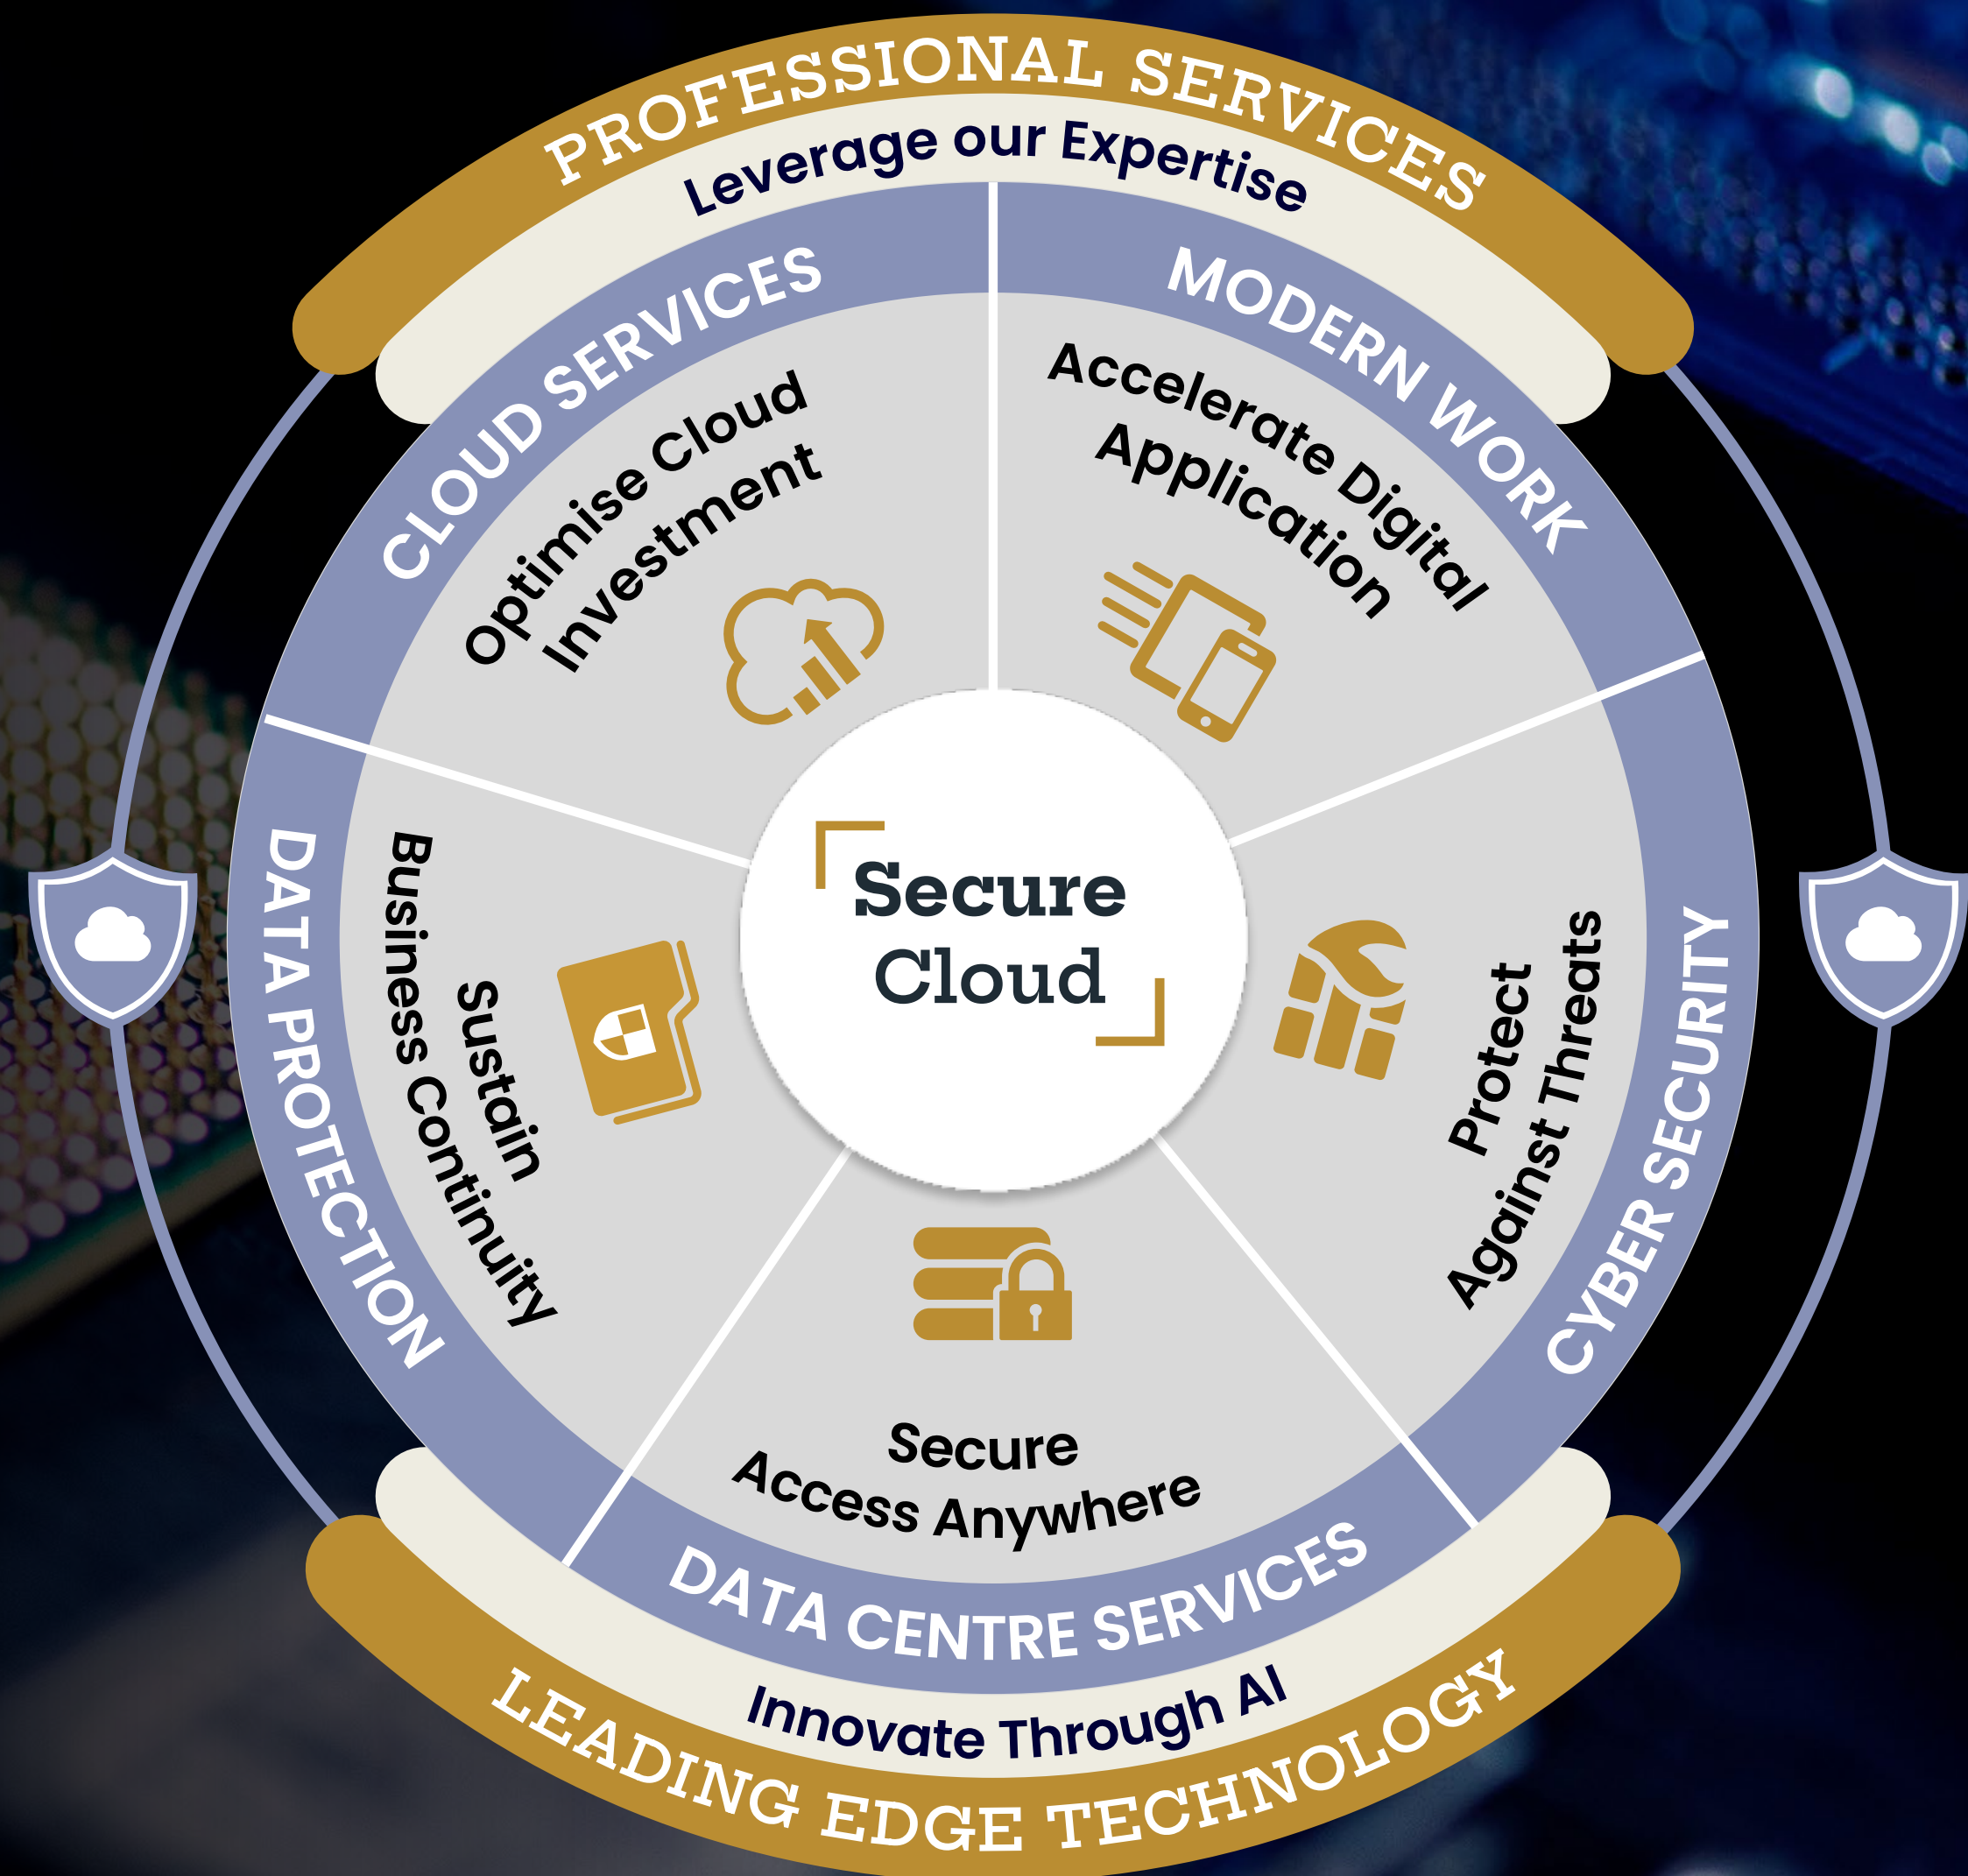

Focused on **What Matters to You**

Wherever you are in your journey we'll help you get there faster and with more confidence.

We combine deep technical expertise with leading-edge technologies to help you thrive – across hybrid and adaptive cloud, cyber security, data protection, modern workplace, and data centre services.

Taking a consultative, end-to-end approach, we support you from discovery and design through to delivery, ongoing management, and continuous optimisation.

Our secure, scalable solutions – powered by strong technology partnerships, UK-based data centres, and a resilient network – give your teams the freedom to focus on what matters most, while we take care of the rest.

Our full-service portfolio supports the outcomes that matter most to modern organisations:

-  **Optimise Your Cloud Investments**
Make your cloud work harder – reducing costs, increasing performance, and meeting the accountability standards.
- › Tailored cloud architecture and design
 - › Managed services to reduce operational burden
 - › Cloud optimisation for cost, performance, and security
 - › Support across Microsoft Azure, VMware, adaptive and hybrid cloud
-  **Accelerate Digital Adoption and AI Enablement**
Empower your people to work smarter and embrace innovation.
- › AI readiness assessments and adoption support
 - › Microsoft 365 implementation and optimisation
 - › Hybrid and remote working enablement
 - › Device and endpoint management

-  **Ensure Organisation Continuity**
Keep your organisation running – even when things go wrong.
- › End-to-end backup solutions
 - › Disaster Recovery as a Service (DRaaS)
 - › Organisation continuity planning and testing
 - › Managed recovery services to minimise downtime
-  **Deliver Secure, Reliable Access**
Ensure high performance and availability across your IT infrastructure.
- › UK-based secure colocation facilities
 - › Resilient, high-speed connectivity solutions
 - › Private and hybrid cloud hosting
 - › Managed infrastructure and storage
-  **Strengthen Your Security Posture**
Stay protected in a changing threat landscape with a layered, proactive security approach.
- › Security posture and vulnerability assessments
 - › Managed Detection and Response (MDR)
 - › Endpoint and network security
 - › Identity and access management

Let's Move Forward Together

We're excited to support the next stage of your journey – and to show you what's possible with our expanded capabilities.

Please get in touch with our team to explore how we can help you move forward with confidence.
