

Wenea –Delivering Future-Proof EV Charging Solutions

Who we are

Wenea is a leading provider of electric vehicle charging infrastructure, with a strong track record across Spain and a growing presence in the UK. Part of the Diggia Group, we combine financial stability, engineering expertise, and digital innovation to accelerate the transition towards sustainable mobility. Our mission is to make charging accessible, reliable, and future-proof—supporting both organisations and communities in their journey to net zero.

What we deliver under the EVCI framework

Through the Procurement Services EVCI Framework, public sector organisations can directly access Wenea's comprehensive portfolio of solutions:

- **Workplace charging solutions:** tailored installations that enable employees and fleets to charge conveniently at work.
- **Public charging hubs:** scalable fast and ultra-fast charging stations designed for high utilisation and community impact.
- **Operation & maintenance services:** full lifecycle support ensuring reliability, compliance, and user satisfaction.

Our value for the public sector

- **Fully compliant** with procurement regulations under the framework.
- **Scalable and cost-efficient**, from small-scale deployments to large hub networks.
- **Proven social value:** reducing emissions, creating local jobs, and ensuring inclusive, accessible charging.
- **Digital innovation:** seamless user experience through the Wenea App and back-office platform.

Proven experience

- **Over 1,600 chargers** installed across Europe.
- Serving a community of **more than 1000,000 EV drivers**.
- **Trusted** by public sector bodies, commercial partners, and fleet operators.
