

Medhurst has been making IT work for all our customers across education, public and business sectors since 1986. Our skilled and experienced team deliver cost effective and flexible IT solutions and services to meet the individual needs of customers across the UK.

As a provider on Lot 1 Remanufactured IT Hardware Products and Lot 2 Refurbished IT Hardware Products, we understand that budgets are tight and will always suggest the most cost-effective solution to meet customer needs.

The benefits of buying a Remanufactured or Refurbished Device

1. **Cost Savings:** Remanufactured or refurbished computers are generally more affordable than brand-new ones. This can be particularly advantageous if you're on a budget or looking to get more value for your money.
2. **Environmental Impact:** By choosing a remanufactured or refurbished computer, you contribute to reducing electronic waste and the demand for new manufacturing, which can help lower the overall environmental footprint.
3. **Quality Control:** The products we supply are subject to rigorous testing and quality control processes. This means that the device you receive has been thoroughly inspected, repaired, and restored to a functional state.
4. **Warranty and Support:** All our remanufactured and refurbished devices come with a three-year warranty, offering you peace of mind that you'll receive technical support or repairs if needed. This is similar to the warranties offered on new products.
5. **Performance:** Our remanufactured and refurbished computers are equipped with updated components and newer operating systems, which ensures excellent overall performance.

Remanufactured Devices

Medhurst is proud to collaborate with Circular Computing™ to offer sustainable, affordable and environmentally friendly remanufactured laptops. Circular Computing's BSI Kitemark™ certifies that their remanufacturing process produces products 'equal to or better than new' as required by BS standard BS8887-220 and BS8887-221.

Remanufactured laptops allow you to get more from your budget, with up to 40% cost savings compared to the latest brand-new models. All devices come with a three-year next day replacement warranty for peace of mind.

To compensate for the carbon emissions associated with each laptop, Circular Computing™ commit to planting five trees for every device purchased, and work with reforestation partners in Africa, Asia and the USA to help reduce the effects of global warming.

Refurbished Devices

Considering a 'Pre-Loved' computer makes financial sense for many organisations. Not only can it provide excellent value for money, but buying refurbished devices also helps to minimise the amount of IT hardware that is disposed of each year, thus reducing waste and the impact of manufacturing new replacement devices.

Medhurst is one of the largest suppliers of refurbished devices in the UK. All our refurbished devices have undergone a series of stringent tests and checks before being shipped. With a three-year warranty and typically costing less than half the price of a new one, refurbished computers are an attractive and environmentally friendly alternative.
