

NCS TECHNOLOGY – IP SECURITY AND ACCESS CONTROL

A collage of four images related to security technology: a white dome security camera mounted on a wall; a hand holding a white access card near a black door reader; a hand holding a tablet displaying a multi-camera security feed; and a person in a blue uniform holding a black walkie-talkie.

 **NCS** TECHNOLOGY
for the next generation

Safe in our hands

Transforming organisations for the better, together.

So, why choose NCS?

NCS technology provide a superior range of internal and external IP CCTV systems that connect straight into your network. Our surveillance solutions are user friendly, offer excellent picture quality and can be installed with minimal disruption.

NCS Technology have been providing technology and connectivity solutions to Kent, London and the Home Counties for over 30 years, we have a reputation built on trust.

We believe we're the experts in connecting things, from bespoke wireless networks and audio-visual installations to installing efficient LED lighting.

We are your go-to trusted partners.

30,000+
AV solutions

1.5million+
metres of cabling

10,000+
wireless access points

Access Control

Our simple and versatile door entry solutions enable you to conveniently manage who has access to your premises. Knowing who is on and off site enhances the health and safety of your team and visitors.

Visitor sign-in and management solutions

Our visitor sign-in and management solutions help you to improve safeguarding in your building or school. With live, up to the minute visibility of who is on site, a visitor management system can simplify your admin by integrating with a pre-existing management information system.

Integrate your systems to achieve maximum security

Combining access control systems with a fully integrated IP CCTV surveillance system means that you can ensure that your site and its users are safe and secure. Using a fully integrated system improves safeguarding and gives you peace of mind.

IP CCTV

Imagine monitoring your site security from anywhere in the world. NCS provide high quality video surveillance that connects directly into your building's network. With our user-friendly interface, you can ensure that you always have the best CCTV coverage.

Using IP CCTV means that you can access live or recorded footage from anywhere in the world from any internet connected device, for example a phone, tablet or laptop. Knowing that you can access your CCTV remotely gives you the peace of mind that your site users are safe and secure.

Our surveillance solutions are user friendly, offer excellent picture quality and can be installed with minimal disruption.

Our team of experts will work alongside you to ensure that your new CCTV system perfectly fits your needs and your budget. Whether you are looking for additional cameras to support your existing analogue system or an entirely new IP CCTV solution, we can create the perfect match for your requirements.

We partner with Milestone Systems, Avigilon, Axis, Mobotix, and HikVision to implement a wide range of IP CCTV solutions from basic network video recorders to complex multi-server video management systems.

Bodycams

A bodycam is a recording device which is worn on clothing and provides a recording from the wearer's point of view. They are able to produce a video and audio feed, which can be remotely accessed and viewed back.

These invaluable pieces of equipment are now worn as standard by UK Police Officers and are increasingly being used in security settings.

Bodycams can be used in a variety of settings, for security and safety, for example when members of your team could be working in potentially dangerous or volatile environments. They can also be used to gather evidence and assist in analysing the cause of incidents.

For companies with remote workers and teams that work on projects away from their headquarters, for example engineers or technicians, a bodycam can also work well as a live streaming and troubleshooting device.

Features include:

- Tamper-proof design
- Pre-record function
- Secure USB that meets GDPR and the Data Protection Act
- Records in High Definition

Benefits of the framework

DIRECT AWARD

Looking for a hassle-free procurement route to source the integrated community care equipment needed?

CUSTOMER FIRST

Passionate about giving your customers the finest solutions to drive transformation?

EXPERTISE & SUPPORT

Want the peace of mind and to benefit from trusted, framework expert advice?

COST EFFECTIVE

Looking to create savings and help drive community improvements?

SUPPORTING THE COMMUNITY

Want to directly impact frontline services of our communities by providing integrated solutions?

How does Direct Award work?

Choosing to Direct Award is always down to the customer to decide.

To help them know if it's the best approach for them, ask if they meet ANY of these criteria...

- Customer is satisfied that, following their own due diligence, they can identify the supplier that offers best value for their requirement
- The supplier is able to supply the required goods/services within the customers timescales
- The supplier scored the highest mark for price/quality in the framework agreement evaluation
- Goods/services required are unique/exclusive to one vendor/supplier
- Continuity of existing goods/services from an awarded supplier

Are any of those boxes ticked by the customer?

If yes, they can Direct Award without needing to do a Further Competition or get three quotes – **it's as simple as that!**

Please note, the customer only has to tick ONE.

Where can I get trusted procurement advice?

KCS Procurement Services offers FREE procurement advice your customers can rely on.
